

# Strategies for Creating Integrated Supportive Housing for People with Disabilities

February 2013

*This brief was prepared by the Technical Assistance Collaborative as part of the Housing Capacity Building Initiative for Community Living Project, a collaboration of the Departments of Housing and Urban Development (HUD) and Health and Human Services (HHS), under the Centers for Medicare & Medicaid Services (CMS) Money Follows the Person (MFP) Rebalancing Demonstration, CMS Contract Number GS-00F-0083N.*

*To learn more about the initiative visit: <http://www.neweditions.net/housing/index.asp>*

## Introduction

Since the inception of the Money Follows the Person (MFP) program, locating and securing housing has been one of the primary challenges states have faced in transitioning people from institutions to housing in the community.<sup>1</sup> Indeed, in a recent report on MFP grantee progress, 32 of the 34 states profiled indicated they experienced significant challenges in securing appropriate housing options for MFP participants.<sup>2</sup> This brief presents case studies of successful state approaches to creating supportive housing that are integrated in housing developments that also contain units that are not targeted for people with disabilities. It also describes how the Department of Housing and Urban Development's (HUD) new Section 811

Supportive Housing for Persons with Disabilities Project Rental Assistance Demonstration (PRA Demo) provides one new option to help expand the supply of integrated supportive housing in communities across the country, helping MFP programs move more people into permanent supportive housing (PSH).

## Case Studies of Successful State Approaches to Creating Integrated Supportive Housing

### North Carolina's Targeting Program

Since 2002, the North Carolina Housing Finance Agency (NCHFA) and the state's Department of Health and Human Services (DHHS) have partnered<sup>3</sup> to create quality, affordable apartments

<sup>3</sup> DHHS also oversees the state Medicaid Agency. NC's PSH program has never been formally linked to the state's Medicaid program although many people served by the program are receiving Medicaid-financed services and supports.

---

for persons with disabilities linked with community-based services using the NCHFA’s Low Income Housing Tax Credit (LIHTC) program. Through its Qualified Allocation Plan (QAP), NCHFA requires that all LIHTC developers have a Targeting Plan whereby 10 percent of the total units in a project must be set aside as PSH for people with disabilities, including people with disabilities receiving Medicaid-financed services and supports. The state created a state-appropriated operating assistance program – the Key Operating Assistance – to provide project-based rental assistance to ensure the affordability of the Targeted Units. Nearly 2,500 units – including accessible units – have been created and made available across the state to the DHHS target population – specifically extremely low-income households with disabilities including frail elders and persons who have been homeless.

To ensure the effective implementation and operation of this PSH initiative, DHHS created a network of Local Lead Agencies (LLAs). DHHS designated an existing nonprofit agency in each region of the state to provide the LLA outreach, referral and unit tracking capacity and infrastructure; generally these were the Local Management Entity for DHHS’s mental health, substance abuse, and developmental disability system. While the designated LLA also provides

services to one or more disability subpopulations, the Targeted Units must be made available to qualified applicants with all types of disabilities. As a result, to be designated as an LLA, the nonprofit must agree to represent the local services system for all people with disabilities for Targeted Units created within its jurisdiction. The LLA also agrees to act as a provider, coordinator, and/or referral agent to ensure that all people referred to Targeted Units are linked to community-based services and supports to sustain their tenancies.

The LLA serves as a “single point of contact” to connect the supportive services system to the owners of PSH units. The LLA, on behalf of the state, has a formal relationship with all owners of Targeted Units through a Memorandum of Understanding (MOU) for each property. In the MOU, LLAs agree to the following:

- » Act as liaison between property management and Targeted Unit tenants’ referral agencies to address issues with tenancy should they arise.
- » Facilitate access to an array of supportive services for Targeted Unit tenants offered by participating human services agencies. These services are available to tenants on an as-needed basis, and receipt of these or any other services are not a condition of tenancy.
- » Facilitate communication with property management, referral agencies and DHHS by designating, and maintaining in the event of staff turnover, named individuals as the primary contact and as the back-up contact on matters related to Targeted Units.

---

This partnership is not formalized through a written agreement but through written policies available on the NCHFA website.

## Strategies for Creating Integrated Supportive Housing for People with Disabilities

---

- » Agencies fulfilling the LLA role must assist property management and participating referral agencies to address the needs of Targeted Unit tenants regardless of tenants' disability type.

As the Targeting Program has evolved so has the role of the LLAs. Initially, they were responsible not only to facilitate access to supportive services when issues arose during tenancy, but also to manage the Targeted Unit referral process. LLAs accepted and prescreened referrals for Targeted Unit eligibility, established and maintained waitlists for Targeted Units, and assisted property management in filling units with individuals from those waitlists.

In fall of 2007, DHHS convened a statewide meeting of LLAs. During the meeting, LLAs expressed concern over the growing demands of managing the referral process for a rapidly expanding program. After the statewide meeting, NCHFA and DHHS determined that a new referral management process would be needed for long-term program sustainability. DHHS has since taken responsibility for managing the referral process for developments with Targeted Units and LLAs have shifted their attention to helping ensure successful tenancies for Targeted Unit residents.

### **Louisiana's 3,000 Unit PSH Initiative**

Six months after Hurricanes Katrina and Rita devastated the Louisiana Gulf Coast region, the state created the Louisiana Permanent Supportive Housing Program. This initiative was one component of the HUD approved hurricane recovery *Road Home Plan*, which was also voted on

by the Louisiana State Legislature and signed by the Governor. This initiative has federal funding to create 3,000 scattered-site PSH units across the entire Louisiana Gulf Opportunity (GO) Zone. As part of this initiative, there is a formal Cooperative Agreement<sup>4</sup> between the Louisiana Housing Corporation (LHC) and the Louisiana Department of Health and Hospitals (DHH), which oversees the state Medicaid program, including MFP.

Several dimensions of Louisiana's PSH program replicate the North Carolina approach. Approximately 1,100 of the 3,000 PSH units are being created through the federal Low Income Housing Tax Credit program administered by the LHC. Developers/owners seeking GO Zone LIHTCs were required to set-aside 5 percent of the units in every LIHTC project as PSH. These units have project-based rental subsidies provided by Congress through the Section 8 Housing Choice Voucher program. The remaining 1,900 units are provided in scattered-site rental housing properties funded with either Project-Based Vouchers (PBV) or McKinney-Vento tenant-, project- and sponsor-based Shelter Plus Care (S+C) rental subsidies. As of fall 2012, Louisiana had leased over 75% of the 3,000 PSH units. However, because of issues with LIHTC syndication and other typical pre-development delays, the program may not be fully leased until 2015.

A pioneering feature of the Louisiana PSH program is that it is designed to serve a cross-disability

---

<sup>4</sup> Most program policies related to the target population, outreach, referral and unit tracking methods, and access to supportive services are provided in an array of other DHH program documents.

## Strategies for Creating Integrated Supportive Housing for People with Disabilities

---

population that was defined in the *Road Home Plan*. Through a six month planning process, state agency staff (DHH and LHC), working with PSH advocates, further defined the target population for the program as “extremely low-income households with disabilities determined by DHH to be in need of PSH.” In addition to these threshold criteria, eligible households could receive a program preference for meeting one of the following additional criteria:<sup>5</sup>

- » Homeless or chronically homeless as defined by HUD;
- » At risk of homelessness as defined by DHH;
- » Inappropriately institutionalized as defined by DHH;
- » At risk of institutionalization as defined by DHH.

Louisiana DHH received a one-time grant of \$72.7 million in federal Community Development Block Grant (CDBG) funding as a part of the *Road Home Plan* to initially fund the supportive services component of the PSH program. These funds provide voluntary, flexible, community-based supportive services to PSH tenants through a best practice mobile Housing Support Team (HST) model. HSTs provide housing-related services and ensure linkages to other community-based services financed by Medicaid and state appropriations. DHH is currently developing a permanent services financing strategy that will include Medicaid

financing for certain HST services, which will replace the federal CDBG funding.

To conduct outreach and referral activities, and to track the availability of PSH units, DHH designated six Local Lead Agencies (LLAs) that operate regionally across the GO Zone.<sup>6</sup> The majority of the DHH-designated LLAs are existing quasi-public Human Service Districts authorized by Louisiana statute to facilitate the provision of services and supports to people in the public mental health, substance abuse, and development disabilities systems. To be designated as an LLA, they are required to conduct all PSH activities through a collaborative approach that involves all disability agencies and providers within their LLA region. Louisiana’s network of LLAs conduct outreach to identify households eligible for PSH; develop and maintain waiting lists for PSH; enter into agreements with LIHTC owners of PSH units and track these units; and pre-screen, prioritize, and refer eligible households for available PSH units. The LLAs also contract with local service providers for over 25 HSTs, each of which consists of 6-8 professional and paraprofessional staff who deliver critical pre-tenancy and housing support and stabilization services to PSH households.

### The State of Pennsylvania

Pennsylvania has established several different state-level partnerships to develop PSH programs. Beginning in 2007, the state’s Department of Public

---

<sup>5</sup> These target population criteria have been formalized in PSH Tenant Selection Guidelines published by Louisiana DHH. See also [http://www.doa.louisiana.gov/CDBG/dr/DR\\_PSH-PHA.htm](http://www.doa.louisiana.gov/CDBG/dr/DR_PSH-PHA.htm).

<sup>6</sup> DHH included the PSH management requirements in its Request for Proposals (RFP) for a managed behavioral health organization and has awarded that RFP to Magellan Health Services. Magellan will take on many of the LLA responsibilities in January 2013.

## Strategies for Creating Integrated Supportive Housing for People with Disabilities

---

Welfare's (DPW) Office of Mental Health and Substance Abuse Services (OMHSAS) began partnering with the Pennsylvania Housing Finance Agency (PHFA) to develop supportive housing for Medicaid eligible populations including people with serious mental illnesses and co-occurring substance use disorders. Components of the partnership include capital investment in affordable housing projects in exchange for a limited number of units set aside as supportive housing and a project-based operating assistance program that matches OMHSAS clients with permanent rental housing funded with federal LIHTCs. Under the OMHSAS initiatives, county agencies have invested over \$86 million to serve an estimated 3,300 consumers. Funds are allocated to capital, rental assistance, supportive services, contingency funds and housing clearinghouses. Using \$32.7 million in capital funds alone, counties are expected to develop 475 units with 168 (35%) of these units already in place.

PHFA has also partnered with the Office of Long Term Living's Nursing Home Transition Program to use HOME Tenant-Based Rental Assistance funds as bridge subsidies until participants receive a permanent Housing Choice Voucher from a participating public housing authority.

Overarching all of these efforts, the PHFA is establishing a pipeline of LIHTC units targeted to extremely low-income households including people with disabilities. DPW is working closely with PHFA on this initiative. Starting with its 2011 Qualified Allocation Plan (QAP), PHFA has required LIHTC-funded developments to set aside 10 percent of the units for households at or below

20 percent of Area Median Income (AMI), including DPW target populations. The DPW target population is defined as people with disabilities - including elders with disabilities - who are:

- » at risk of or who are currently living in institutional settings including but not limited to nursing facilities, mental health institutions, personal care home facilities or facilities for people with developmental disabilities;
- » people with disabilities who are homeless or at risk of homelessness;
- » adults with autism who require ongoing support to live successfully in the community; and
- » youth aging out of the foster care system who require ongoing support services to live successfully in the community.

DPW is partnering with PHFA on creating arrangements for DPW to designate a LLA in each of the Commonwealth's 67 counties to manage applicant referrals, tracking of unit availability, and to serve as a single point of contact for developers and owners, assisting in problem resolution to sustain tenancies as needed. All households referred by the LLA must be eligible for comprehensive community-based services funded through one of DPW's priority populations programs including, but not limited to, persons receiving services in Pennsylvania's Health Choices Behavioral Health carve-out under a 1915(b) waiver, and persons being discharged from long-term living facilities such as nursing homes or developmental centers.

### **The State of New Mexico**

The New Mexico Mortgage Finance Authority (MFA) and the New Mexico Department of Human Services (DHS) and their Behavioral Health Managed Care Partner, Optum Health, have worked in partnership to formalize policies in the LIHTC program to create PSH units. The 2013 and other recent QAPs for LIHTCs provide bonus points to developers that agree to set aside units for “Special Needs Housing,” have agreements with LLAs, and/or limit at least some of the units to households with incomes of 30 percent of AMI or below, charging no more than 30 percent of those households’ income as rent. New Mexico has commitments from LIHTC developers for approximately 145 PSH units through this program.

In New Mexico, the target population is “Special Needs Households,”— which includes people with serious mental illness, addictive disorders, developmental disabilities, physical, sensory or cognitive disability (after age 22), disability caused by chronic illness, age related disability, or a homeless individual or family (regardless of disability).

The program is administered through seven LLAs who are selected by Optum to provide referrals to housing and services for eligible populations. Since the New Mexico MFA does not currently have access to project-based subsidies to ensure affordability of the PSH units, projects have been successful in independently identifying project- or tenant-based Housing Choice Vouchers from public housing authorities to help make rents affordable to

households at 50 percent of Area Median Income or below.

The New Mexico program relies on the existing community-based service system to provide supportive services to people who are referred to supportive housing units within LIHTC properties. As a result, to be referred by the LLA, an eligible household must have access to appropriate supportive services that are either Medicaid or state-funded services. An agreement is entered into between the housing developer, property manager and LLA outlining referrals, wait list protocols, and timelines.

### **Massachusetts Community Based Housing Program**

The Community Based Housing Program (CBH) was created as a state bond-financed housing program for people with disabilities. The CBH program is administered by the Massachusetts Department of Housing and Community Development (DHCD) in partnership with the Massachusetts Executive Office of Health and Human Services (EOHHS), which also oversees the state’s Medicaid program. The legislation creating the CBH program stipulates collaboration between DHCD and EOHHS.

The CBH Program target populations are identified as people with disabilities, including non-elderly adults as well as frail elders, who are in institutions or nursing facilities or at risk of institutionalization. The goals of this program as stated in the published CBH Guidelines are:

## Strategies for Creating Integrated Supportive Housing for People with Disabilities

---

- » **Integration:** Housing for people with disabilities should be designed to integrate people with disabilities into the community as fully as possible. In the most integrated, least restrictive housing environment, support services should be available when necessary to help ensure a successful tenancy and lease compliance.
- » **Maximum Control:** People with disabilities should have the maximum control possible in their housing choices and management.
- » **Accessibility:** The state will seek to promote maximum visitability<sup>7</sup> in all publicly funded housing. This will better ensure people with disabilities have access to integrated housing in all communities.

CBH provides funding to either nonprofit housing organizations or for-profit developers. Though CBH originally was limited to nonprofit developers, the legislation was amended to include for-profit developers in order to expand choice and access to affordable units in all communities. Since 2005, approximately 251 CBH housing units have been approved with 161 units occupied<sup>8</sup> or in process of leasing up. Under the statute, CBH funds must be linked with “an enhance[ed] community-based services plan prepared by the Secretary of Health and Human services, in consultation with the Director of Housing and Community Development.” People referred for the program are

receiving a broad array of community-based services and supports, including 1915(c) waiver home and community-based services.

Unlike the other states’ approaches, in Massachusetts, the state, rather than a regional network of Local Lead Agencies, plays an active role in the outreach and referral process, as well as in verifying eligibility for specific individuals as CBH units are leased. EOHHS has assigned the Massachusetts Rehabilitation Commission (MRC) to manage this process and track all available CBH units. When a CBH unit becomes available, this agency notifies the 5-7 partner state agencies that manage the public systems providing services and supports to people with disabilities. MRC also notifies the state’s network of nonprofit Independent Living Centers (ILCs) that are funded (under MFP and other programs) to go into nursing homes to help people transition to community-based living. These ILCs are also a key component of the state’s fiscal agent system for the Personal Care Attendant (PCA) program.

CBH tenants bring their own individualized support services to the program. They have a range of services from self-directed Medicaid-funded PCA services to a comprehensive package of home and community-based services under the state’s Medicaid program. In 2011, CMS selected Massachusetts as a MFP Demonstration State. As a result, it is likely many of the tenants in new CBH or turnover units will be MFP participants eligible for Medicaid-funded community-based supports.

---

<sup>7</sup> Visitability is sometimes referred to as basic home access or inclusive home design. For more information go to:

<sup>8</sup> As of October 1, 2012.

### Section 811 Supportive Housing for Persons with Disabilities PRA Demonstration

The U.S. Department of Housing and Urban Development (HUD) Section 811 Supportive Housing for Persons with Disabilities Program assists the lowest income people with significant and long-term disabilities to live independently in the community by providing affordable housing linked with voluntary services and supports. In 2010, the Frank Melville Supportive Housing Investment Act modernized and reinvigorated this important HUD supportive housing program, including authorization of the Project Rental Assistance (PRA) option. The Section 811 reforms are intended to promote a national expansion of integrated PSH by fostering partnerships among state housing and health and human service agencies to leverage mainstream affordable housing, Medicaid, and related community-based support services resources and to ensure people with disabilities can access these new housing opportunities. The experience of several of the states discussed above led to the supportive housing innovations in the Melville Act.

In May 2012, HUD issued a Notice of Funding Availability (NOFA) for HUD's Fiscal Year (FY) 2012 Section 811 Supportive Housing for Persons with Disabilities Project Rental Assistance Demonstration (PRA Demo) Program. The PRA Demo NOFA announced the availability – for the first time – of \$85 million in Section 811 PRA

Demo funding to identify, stimulate, and support innovative state-level partnerships and strategies that will transform and increase PSH options for extremely low-income people with disabilities, including MFP participants. The response to the NOFA was overwhelming, with 35 states responding. In February 2013, HUD announced the selection of 13 of these states for conditional awards. Recognizing the great need for, and interest in the PRA model, the President's FY 2013 budget request included funds for additional Section 811 PRA units.

MFP programs will want to help their states secure these new 811 resources for several reasons. In many states, the target populations for the Section 811 PSH units are MFP participants, other persons with disabilities living in institutions or nursing facilities or those at risk of institutionalization; in some states MFP participants are first priority for the 811 units. The Section 811 PRA Demo was one of only two FY 2012 programs with funds for new supportive housing units. The PRA Demo offers states an opportunity to diversify as well as add to their portfolio of PSH with units that are integrated in developments that also contain housing units that are not targeted for people with disabilities.

### Conclusion

The experience of the MFP program has highlighted how critical partnerships between housing agencies and Medicaid programs are to the success of states' efforts to rebalance their long-term care systems and move more people into integrated community-based settings. As MFP Project Directors, Housing

## Strategies for Creating Integrated Supportive Housing for People with Disabilities

---

Coordinators, and Transition Coordinators know, the limited availability of affordable, accessible housing that meets the definition of a “qualified residence” under the MFP program is a common barrier to transitioning more people to community-based housing. States like the ones profiled here have developed the infrastructure to help people with disabilities access supportive housing. The new funding and requirements for state-level housing and human services partnerships under HUD’s Section 811 Demo offer states one important way to expand availability of permanent supportive housing. Future briefs will explore other funding mechanisms – such as Project Based Vouchers through Public Housing Authorities – that MFP Programs can use to expand the pool of affordable, accessible housing.

This brief was prepared by Francine Arienti and Lisa Sloane of the Technical Assistance Collaborative. Editorial assistance was provided by Ann O’Hara, Emily Cooper, Kelly English and Jenny Chan. For additional information and related resources, visit <http://www.tacinc.org/>.
